

TOURNAMENT GUIDE

- **Start** by creating or printing out the tournament poster.
- Ensure all students know the rules of the game. Decide whether you are playing one match or best of 3.
- Write each player that opts into the tournament on the outside line of the tournament poster. Students are to find their opponent and set up a game of Number Hive using the 'play a friend' option or the printable game board of the teacher's choosing. The winning player progresses inwards to the next game and plays against another winner.
- The losing player may support their champion or can find another person no longer in the tournament to play against.
- The grand final takes place when there are only two players left. It can be fun to have this game played on the big screen. Once there is only one player left, they are the Number Hive class champion. Encourage the champion from each class to play off in order to find the grand champion. You can find certificates to present here.
